

# Port of Longview

The Port of Longview is the first full-service operating port on the deep-draft Columbia River shipping channel in Washington State. From here, reach your cargo destinations via one tide to the Pacific Ocean or direct connections to both mainline rail and major interstates. The port boasts eight marine terminals and waterfront industrial property spanning 835 acres, a full fleet of cargo handling equipment and additional on-site services that make it the premiere West Coast cargo handling destination.
